

# NOX

## LIGHT THAT FOLLOWS

Multi-functional, battery powered table lamp

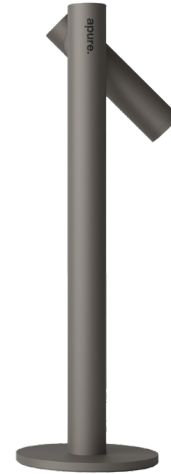

### Description

NOX is more than just a table lamp—it's a multi-functional lighting solution that can adapt to every part of your life. Whether you're illuminating your desk for focused work, brightening dimly lit corners, or creating an inviting atmosphere in restaurants or at home, NOX brings light wherever it is needed. Perfect as a night light or ambient lighting for evening gatherings, its uses are nearly endless.

With a sleek, portable design and a convenient charging base, the NOX lamp can be effortlessly moved throughout your space. For even more versatility, the fixture head detaches, allowing you to take the light with you. Available in three refined powder-coated finishes—Onyx Black, Nimbus Grey, and Dune Beige—NOX complements any setting with elegance. Designed for extended use, NOX provides up to 14 hours of portable battery life, with a subtle indicator that lets you know when it's time to recharge. Even when disconnected from the lamp base, the portable lamp head recharges automatically when reattached.

The soft 3000K warm white light is fully dimmable by touch, letting you create the perfect mood for any occasion. A frosted lens ensures beautifully diffused light, while the adjustable beam spread can be fine-tuned with a simple twist of the lens, offering both focused or a flooded light.

NOX is the ultimate lighting solution, combining flexibility, style, and performance.
